

Website Handoff Documentation

This document contains all the necessary credentials and information for your new website. Please follow the "Next Steps for the Client" section immediately upon receiving this document to secure your accounts.

Project Details

- **Project Name:** Vote Hill Treasurer
- **Custom Domain:** votehilltreasurer.com
- **Public Email Address:** `info@votehilltreasurer.com`

Credentials & Accounts

1. Master Email (ProtonMail)

This email acts as the master key and recovery address for all other accounts.

- **Service:** [ProtonMail](https://proton.me) (<https://proton.me>)
- **Login Email:** `HaydenHill2026@protonmail.com`
- **Password:** `sW8#pQ#zL2!vY7$k`
- **Notes:** There's a recovery key PDF that is saved in the directory that contains all content.

2. Domain & DNS Management (Cloudflare)

Cloudflare handles your custom domain registration and routes your custom domain emails to your preferred inbox.

- **Service:** [Cloudflare](https://dash.cloudflare.com) (<https://dash.cloudflare.com>)
- **Login Email:** `HaydenHill2026@protonmail.com`
- **Password:** `gK9!vL2^xF0@yT5#`

- **Notes:** You will need to add a payment method here for the annual domain renewal, as the original payment method will be removed upon handoff.

3. Website Hosting & Code (GitHub)

GitHub stores the actual code for your website and hosts it for free via GitHub Pages.

- **Service:** [GitHub](https://github.com/login) (<https://github.com/login>)
- **Login Email:** `HaydenHill2026@protonmail.com`
- **Username:** `HaydenHill2026`
- **Password:** `mZ4$pW7*bQ1&dJ8%`
- **Notes:** The website repository is located at <https://github.com/HaydenHill2026/votehilltreasurer>.

Next Steps for the Client (CRITICAL)

To ensure these accounts belong completely to you and are secure, please complete the following steps within 24 hours of receiving this handoff:

1. • **Log into all accounts:** Access ProtonMail, Cloudflare, and GitHub using the credentials provided above.
2. • **Change ALL Passwords:** Update the passwords for every service to something only you know (we strongly recommend using a password manager like Bitwarden or 1Password).
3. • **Enable Two-Factor Authentication (2FA):** Add your personal phone number or an authenticator app to each account (especially ProtonMail, Cloudflare, and GitHub). This is the most important step to secure the accounts.
4. • **Update Recovery Information:** Add your personal email address or a trusted phone number as a backup recovery method on the ProtonMail account.
5. • **Add Billing Information (Cloudflare):** Log into Cloudflare, navigate to Billing > Payment Info, and add your credit card. This ensures your domain name will successfully auto-renew next year and your website stays online.
